

# Armada Power App

## Control Your Systems from Anywhere

Powered by  
**armada**

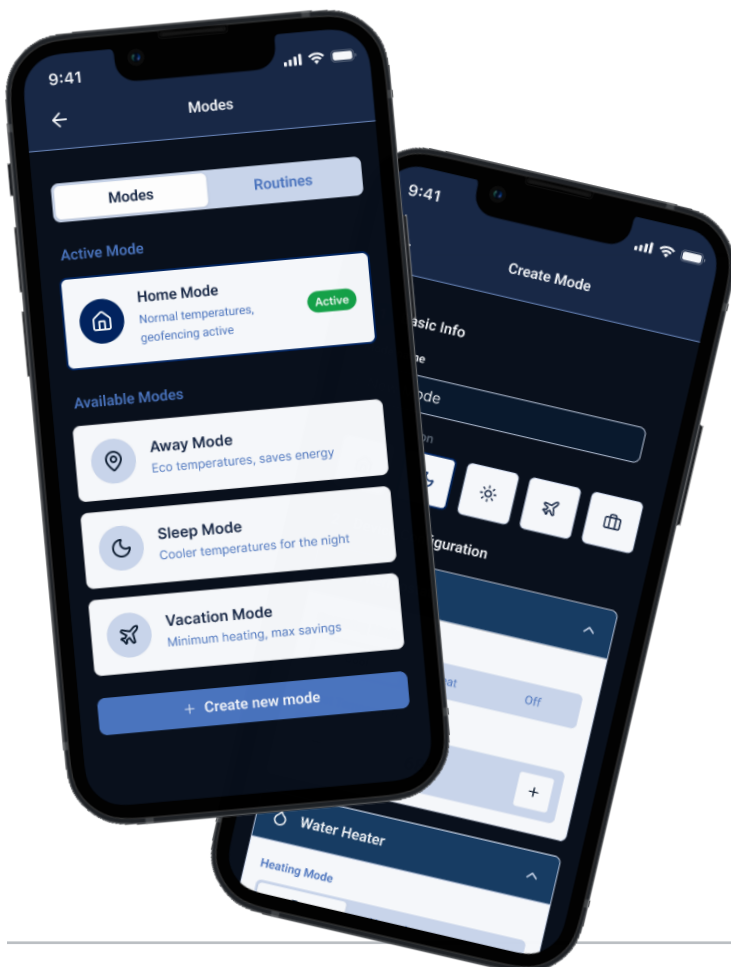

### Comfort, Control & Confidence – All from Your Phone

Access system data, receive alerts, and take action anytime, from anywhere.

#### Value for the Property

Property teams and owners use the Armada Power app to connect directly to Fleet Commander, for 24/7 portfolio-wide visibility and control from anywhere.

- **Portfolio-Level Visibility:** Access unit-level data across properties through a single interface.
- **Remote System Control:** Adjust thermostats, water heaters, and system settings without entering units.
- **Immediate Response:** Act on alerts and manage issues instantly, even off-site.

#### Value for the Resident

The Armada Power app puts control of your home environment in your hands. Adjust your thermostat, monitor your water heater, and view your home's temperature and humidity levels in real time, all from a single, easy-to-use interface. With 24/7 leak monitoring and instant alerts sent directly to your phone. The system identifies moisture as soon as it appears, helping prevent water damage, protect your belongings, and avoid the disruption of repairs or displacement.

- **Smart Thermostat Control:** Adjust temperature settings anytime, from anywhere, for consistent comfort.
- **Water Heater Optimization:** Ensure hot water is available when needed while reducing unnecessary energy use.
- **Live Status Updates:** Monitor temperature and system status while you're away from home.
- **Proactive Alerts:** Get notified of leaks or system irregularities when they occur.

#### Key App Features

- **User-Friendly Interface:** A simple, intuitive design makes it easy to monitor systems, respond to alerts, and take action quickly.
- **Real-Time Monitoring:** View temperature, humidity, and system status in real time, so you always know what's happening.
- **Proactive Alerts:** Receive alert notifications for leaks, system issues, and performance changes when they occur.
- **Remote Control:** Adjust thermostats and water heater settings directly from the app.
- **Leak Detection Visibility:** See when and where moisture is detected, helping you act quickly to avoid damage, mold, and disruption.

### From Reactive Management to Predictable Performance.
